Abstract

This article introduces the *business models for sustainability innovation* (BMFSI) framework to study how business models mediate between sustainability innovations and business cases for sustainability. The BMFSI framework integrates two major perspectives (implicitly) found in the sustainable business model literature. The first is the *agency perspective*. It takes into consideration that some form of agency is needed, that is, "someone" who takes decisions and acts. Sustainable entrepreneurs are discussed as agents who align their new or existing business models with sustainability
